ONE MORE YEAR OF BIOMED MECH REP!!

Program: 5th Year Biomed Mech Eng

Running for: Biomed Mech Eng Rep

Contact: via Discord (pike4115) or Email (vijaythirunavukkara@gmail.com)

Platform

I hope to continue representing our small program of under 150 students within CSES, MAE, and FED! I've been through this program for five years now, and I'm well versed in both the industry expectations and the issues experienced by Biomed Mech students along all parts of the course tree.

In particular, my ambitions for a second term is to foster more opportunities for biomed mech to explore the biomed side of our degree, both in and outside of the course tree.

Experience

- **CSES:** Biomed Mech Eng Rep(24/25)
- **CUBES:** 4th Year Rep (24/25)
- **CMAS:** Office Volunteer (25)
- **Leo's Lounge:** Volunteer (21/22, 24/25)
- **CASG:** Academic Initiative Fund Committee Member (24/25)

About

I'm a 5th year Biomedical and Mechanical Engineering Student. I am an avid fan of D&D, especially when I get to move 16 monsters every turn as a player. I also love to spend my time gardening, with varying degrees of success. Additionally, I maintain the firm belief that blood as a fluid should not exist, and whoever had the bright idea to invent the stuff wanted to sell viscosity models.
