Spreading Gratitude

C-Eng Style!

Hi all. Seeing as this month's theme is "Gratitude," let's take this moment to do a bit of a C-Eng thanksgiving.

Let us thank the Lord of Stats, Glenn McRae, for not failing us in 1010. Let us thank Lord of Pointers, Don Bailey, for reminding us that arrays are not pointers (a mistake surely anyone can make). Let us thank The Lady of Flowcharts, Lynn Marshall, for showing that amusing bubblesort dance video. Of course let us thank the Lord of MATLAB, Kevin Goheen, for ending class "prompt-

ly" ... jk lol.

Now, of course, these are profs, but we shouldn't forget the rest of the people who make C-Eng C-Eng. Let us be grateful for the Lord of Caffeine, Real Gabe, that is Gabe Wong, who even after graduating last year and getting a job away from Carleton (ikr) is RETURNING to Leo's, our home. Let us be grateful for the Leo's managers who put in so much of their own time and energy to keep this home-away-from-home running smoothly with its super-dope muffins and samo-

sas (as I write this I now crave Leo's samosas). Of course let's thank all the volunteers and execs of the C-Eng associations: CSES, CMAS, IEEE, SCESoc, CSCE, CUBES, SREESoc, CEPS, BITSoc, AASA. To these and any other group I may have neglected to mention, we are thankful for you.

Let's not forget the memes. Let us thank the memes (yes, even stale January memes). From Tide pods to used car salesman. From Ugandan Knuckles to EA memes. Let us thank all the memes.

WARNING:

How to be great at being Grateful

“What is something you are grateful for?”

Something about that question really takes me back to kindergarten, when we had to actively be taught to acknowledge and appreciate what exists outside of our immediate personal bubbles. We've been asked to consider this question a billion times throughout our lives, and it seems so basic that as I drew inspiration from it for this month's Iron Times, I was afraid it would sound patronizing. We're adults, of course we all know what it means to be grateful! Perhaps the sheer prevalence of this theme in our “privileged first-world lives” makes us tune out, and though we know we have so much to be thankful for, we don't really think too hard on it. But what good is gratitude if we don't make it personal?

The way I see it, we could all stand to be a bit more grateful. Engineering students can be particularly pessimistic; there's never any shortage of troubles or inconveniences for us to complain about. Between overloaded schedules, exam stress, and professors who will take any opportunity to fail you (stay strong, my fellow kids in Elec II), life can feel pretty shitty sometimes. Hearing an old cliché such as, “At least you're blessed with the opportunity to pursue a post-secondary education! Be grateful!

:D” offers little comfort, no matter how many times your mom says it.

This month is the perfect time to relinquish those bad vibes, and not only for the obvious reason that it's Thanksgiving. The onset of autumn also reminds us that winter is coming -- a (literally) dark time for all of us. As a firm believer that October is the most lit month of the year (ThIs iS hAlLoWeEN), I don't want to take any of it for granted. It's the good friends, fond memories, and simple pleasures that give us energy to power through tough times and live our best lives. Shifting our focus from bad to good and showing a little appreciation will work wonders on our collective mental health.

So this month, make the extra effort to be acknowledge the things that matter to you. Be grateful that you have Leo's to call your home during those long school days. Say a big thanks to your friends who helped you cram for your midterms. Appreciate the profs who, despite their harsh teaching methods, are doing their best to help you really learn the material.

And while you're at it, I'll add a list of some more things you can be grateful for. Enjoy your October y'all. Stay wholesome and keep it spooky!

Let's be grateful for...

- Family
- Friends
- The new Leo's coffee machine
- Bell curves
- READING WEEK
- The existence of dogs (they are so good!!!)
- Ottawa's wonderful transit system (ok maybe not...)
- Cats (also good!!!)
- Tiny houseplants
- People who give out full-size candy bars on Halloween
- PDFs of textbooks
- Bugs, apparently? @Imaginarious
- The Iron Times
- Wholesome Halloween costumes like this one:

“The Most Amazing Halloween Costume Ever”

based on a story by np312

EDITORIALS

HALLOWEEN HUSTLE

Elizabeth Wilson
- SOFT II -

Hey again C-Eng! Between stores filling with mini candies, temperatures dropping, and midterms rapidly approaching, it certainly looks like spooky month!

Now, I love Halloween. October through December is my absolute favourite time of the year, I love the cold, the colours, the festivities, and I've always loved planning and making extravagant costumes; but these can be expensive and time consuming! Lets face it, I know you all have been busy with midterms, and Halloween is on a Wednesday, and, hell, not everyone likes sewing and painting their face like I do. So, for all of you who don't want to buy a costume from the store and are stuck on the night of with nothing to wear, I've compiled a list of "fun" and "original" Halloween costumes so you can stop re-using your outfit from Envy. (Seriously. It's just plain cheating at this point.)

#1 Just the Whole 3300 Block

Grab the whole squad and enough boxes for each of you and decorate yourselves like all of your favourite student societies office spaces (Costume not available for students in SCE)

#2 A Happier You

Embrace the inevitable future invitation to continue in an alternate program after those midterm marks this Halloween by

cuffing your jeans, grabbing a shoulder bag not weighed down by Thermo textbooks and smile, knowing you won't have class till noon.

#3 A(nother) Happier You

We here at the Iron Times don't discriminate with who we make fun of, and so feel free to wear a full suit where it is absolutely uncalled for as you prepare for a future climbing the stairs of Dunton.

#4 Tasty

What better way to look like a snack this Halloween then dressing as some of the food from our very own Leo's Lounge? Whether you go through the effort of decorating your muffin top with drawn on chocolate chips and a paper wrapper skirt, or you just tape half a Leo's spicy sandwich to either side of your torso, you can rest easy knowing you'll have a snack for later, even if nobody understands your costume.

#5 Everyone's Favourite Professor

Grab yourself a big grey cardigan, draw a beard on your face and toss a big green clock around your neck and there you have it! Be wary though, this costume only works if you're the only one wearing it. If it were to become too common that certainly would be a . . . tragedy.

#6 Alternative Uses for the Charlatan

Ah yes, the classic toilet paper mummy, only this time you don't have to waste any of that precious TP. Scary from a distance, it's even spookier once you get close enough to see the "journalism".

If all else fails, it's a Wednesday anyway, just throw on some pink and go with the squad as the cast of Mean Girls, or HAMP it up in your flighsuit or FIT shirt. Whatever you decide to go as, just be sure to stay warm and

safe this holiday!

Finally, just to close off and as a little sidenote, bring us back to this issue's theme of gratefulness, I'd like to give a shoutout to the whole Iron Times team, our editors, writers, Love Spreaders, and readers, and most specifically our amazing Editor in Chief, Caroline Lenarcic, who is one of the most organized and helpful people I know, and I definitely couldn't do any of this without her. (Sidenote: her birthday is also this month, October 25th, so feel free to show her some love/cake). All in all, I'm very happy and thankful for this amazing team, and all of you reading this. There's no better group than C-Eng to write a newspaper with! Thank you!

THERE'S A SHERIFF IN A NEW TOWN

Kevan MacKay
- ENG PHYS V -

So you're considering a fancy out-of-town co-op, huh? Neat! I'm proud of you. Last Fall I had a co-op in Montreal, and as an introvert whose entire social circle existed in Ottawa, it sure was a challenge at times. Here are some tips so you don't go crazy from isolation or contract a fatal case of FOMO:

HOUSE HUNT EARLY AND DON'T BE AFRAID TO BE PICKY

If you're not planning on visiting the city in which you'll be working to view a potential rental, prepare yourself for a worst case scenario. In my case, I was pressed for time and needed a place as soon as possible so I jumped on a house where I'd be living with my landlord. But here's the problem with that: landlords won't bring up "concerning" things in a Skype call unless they legally have to, and there are a lot of questions you wouldn't think to ask unless you've actually seen the place. Stuff like: "Why does my room have glow in the dark stickers for children on all the walls?", "Why are there rotting floorboards hidden under the bed in my room?", "Why is the only source of light in my room a single table lamp with a red light bulb?", "Why can't I use the dishwasher and also why do you re-use plastic cutlery?", "Why did you advertise a laundry machine if I can only use it on Saturdays because it's in the basement and the basement tenant doesn't like you waltzing into his bedroom?", "Why is only 1 of the 6 lightbulbs in the bathroom functional?", "Why is it so easy to break the shower's cold water tap so I then have to shower using a bucket filled from the sink?" Standard, run-of-the-mill questions obviously, but pretty easy to forget during a Skype call! But hey, it was \$480 with utilities included so I got what I paid for (he also insisted on not signing a lease so it was probably a tax scheme tbh).

But honestly, even if you're going to live in a shithole, at least live in a shithole that's close to downtown. I was in the tough situation where I worked on the west end of the island of Montreal but lived in a suburb on the Midwest island. Bussing was a nightmare to get to and from downtown which made it hard to just casually go exploring. More than anything, ease of access to downtown is what is going to make or break your living situation because it will keep you from staying out late and trying new restaurants and festivals. If your commute and budget can handle it, then live close to the hub of your new city.

KEEP YOUR HOBBIES OR GET NEW ONES

Routines are your friend. They get you out of the house and keep you active. They're familiar and easy once you start them and don't even need to be that elaborate. For me, it was playing squash once a week with coworkers, something I hadn't done since Grade 9. Sometimes I would just walk around my neighbourhood, and get a coffee and some fresh air in the winter. I had an excuse to go see movies in theaters again, which is how I ended up being the only person in the theatre for the 10pm Sunday showing of *Coco* during a blizzard. It just needs to be *something* so you break out of a slump if you feel like you're sliding into one. I ended up working heavily on my Youtube channel that semester, and it felt like some of my best work in ages. Honestly, even a dumb bucket list of neat sounding restaurants or shops with patches are a good outlet. There's nothing wrong with touring a city's landmarks and taking a bunch of cheesy photos either.

MAKE FRIENDS OR DIE TRYING

This was probably the most challenging aspect of moving away for

me. I'd say upwards of 75% of my existing friends were made through school, and maybe another 15% were made through work or similar obligations. You don't realize just how hard it is to find people you connect with outside of school until you're forced to start from scratch. Your work group is certainly a good place to start, but not every co-op is going to have ideal demographics for that. In my case, the most I did to socialize outside of work hours was getting my ass whooped in table tennis by my 72 year old co-worker. It was honestly very intimidating trying to make friends given the age gap between my coworkers and myself, as well as how far away I lived from downtown Montreal. Luckily, a ridiculous coincidence happened to me that summer which resulted in one of the highlights of my time in Montreal.

STAY TUNED

My Youtube channel has a bunch of videos about video games, specifically licensed video games, but even more specifically Spongebob video games. It just so happens that two top results when you search for "Spongebob Squarepants Battle for Bikini Bottom" are myself and a Concordia Software Engineering grad named Denis. So through the magic of shitposting, Denis and I had been messaging each other about meeting up since I got a co-op there, and we became weirdly good friends. We even made a comprehensive video of every video game bar in Montreal (*cough* <https://www.youtube.com/watch?v=v-hW-PGNN3I> *cough*) and later skateboarded down the Olympic Stadium's steps on pizza boxes for another video. So I guess the lesson here is to not listen to your parents when they say "don't meet strangers from the internet". Or, you know, make friends any way you can.

MUTE THE FLIGHTSUITS FACEBOOK PAGE

Just do it. All it's going to do is taunt you, plus you can always turn it back on when you're back in school. If it's worth getting invites to parties you can't go to all semester just for the memes, then that's your cross to bear. But to be honest, even with it unmuted, it's almost impossible to follow the mayonnaise/Taite/bugs/etc. memes the kids are into these days, so you might as well just pull the plug.

COMMIT TO THE BARE MINIMUM; YOU CAN ALWAYS EXTEND LATER

By far the most important lesson I learned was to not force something that wasn't working out. In the end, the job I signed on for was not a good fit at all, it was clearly meant for someone with decades of experience in the field (or even just someone who could legally sign-off on paperwork). I was bored to death during the day, and my living situation was more of a getting-by situation. There was a chance I might get to switch groups and get a different workload the next semester but that was a BIG maybe, so I cut my losses after 4 months. I was immediately much happier when I got back. I had a job with legitimate responsibilities and I lived in a house with roommates I could actually talk to. As much as you may want to break out of your comfort zone and challenge yourself in a different city, it should not come at the expense of your mental health. And it's not like I had to make up my mind on the spot either, I had until about mid November to decide whether or not I was extending, and even after I went back on my initial decision I was given a great reference. When you're a co-op, nobody cares if you're job hopping -- that's the point of co-op. Don't lock yourself into 16 month positions when your co-op schedule is for 8, you'll be stuck in the same low-skill job the whole time when you could easily be learning, earning and doing more by applying to new jobs each term.

Even though my out-of-town co-op wasn't exactly a rewarding experience in the normal sense, it was still a learning experience. Hopefully you can make use of these tips without having to deal with the messy stuff yourselves!

ANGRY REACTS IN 3... 2... 1...

Caroline "Life of Pi" Deluce
- ENG PHYS III -

Many of you know that I'm quirky AF. Few of you know that I like to cook. This article will combine these two aspects of myself into one weird-ass cooking show. Well more like a cooking article. Same difference.

This month we're gonna make a fan favourite, pizza! Who doesn't love pizza? No matter how sketchy it is, pizza can only be aggressively mediocre and never horrible. Now, food is an art form as much as it is a necessity to survive, and as an Eng-Phys I definitely consider myself an expert with artistic abilities. Definitely. Speaking of art, we need to talk colour. More importantly the colour red. Because it's a fantastic colour. It is breathtaking, beautiful, fierce, sexy, powerful, and it's actually my favourite colour! What food is red in colour? Strawberries. Damn, strawberries are delicious. They make me nostalgic for the farm I used to work at. Strawberries are sweet and delightful and are filled with so much joy. So naturally, we are putting strawberries on pizza. It is the logical thing to do. Move over, pineapple-eating plebs, we intellectuals have a new dish to devour.

You will need:

- Fresh strawberries
- Discounted garlic naan (ain't nobody got time for dough!)
- Canned pizza sauce
- Garlic powder
- Roommates that are dead inside (for tasting, not for eating)
- Spanish onions
- Shredded mozzarella cheese produced from virgin cattle and milked by less virgin milkmaids from the Monaciano Alps during a crescent moon (if you can't get this kind of cheese, store bought is fine)

Cooking ~with~ Caroline

1. First you need to heat the oven to 350°F. Scientifically, there's actually a legitimate reason why that temperature is best for cooking. It's actually a really cool fact, it like changed the way I viewed cooking. Anyways, I was hangry that day so I baked it at 400°F. Wow, I wish I knew what temperature that is in radians.
2. Next, place the naan in a pan that fits the naan. Seductively pour and spoon pizza sauce all over dat naan, it's crucial that this pizza is made with love. Make sure to open the can before pouring its contents onto the naan.
3. Now time for the cheese. It should be pre-shredded because we live in a fast-paced world, and I barely have enough time to walk all the way to school from Grove, so shredding my own cheese is out

of the question. Now, if you are sensitive to gluten, you can easily substitute naan for gluten free naan. However, if you're lactose intolerant, cut the bullshit because we all know you're going to eat the cheese regardless.

4. Now, place the sliced onions and strawberries onto the pizza. Originally I was gonna add bacon but I forgot to buy some, so I just used the pork fat I had conveniently in my fridge instead. Pork fat is a great source of fat. Once all the toppings are on, sprinkle garlic powder on top of the pizza. Adding garlic is essentially equivalent to entering the astral plane. How much do you add? JUST ENOUGH.
5. Next we are going to put the pizza in the oven. Leave it in there for a certain length of time. I

don't know how long cause I was too busy making sure the pork fat was cooking so that I didn't give my roommate salmonella. I had it once and 10/10 do not recommend contracting salmonella. Bring out the pizza when it looks golden brown, like the pizza just walked out of a tanning bed. Well, I guess an oven is really just a tanning bed for food. Woah.

There you have it, that's how you make Caroline Pizza. Yes, I named it after myself - when you discover or create something great, that's what you do. Example: Maxwell's Equations, Einstein's Theory of Relativity, Wendy's™, etc. Though I think my italian family might disown me after reading this. Anyways, stay tuned next month for some more "unique" and "creative" recipes.

"That looks disgusting XD I'm sorry I love you."

-Teo Blidaru

"For a moment I forget that there's strawberries and I enjoy the thought of pizza. I smile. Then I open my eyes and look upon the red mushy devils and I weep."

-Mac Willis

"U are the most disappointing italian ever."

-Jasmine Eriksson

"Do you think god stays in heaven because he fears what he has created?" -Steve Buscemi"

-Nicole Mackin

Fist bump during frosh week, changed my life forever.

In second year I took a philosophy course as an elective and when the term paper came around I took my sweet time to write it. So sweet in fact that I finished it and printed it out 90 minutes before my train to Toronto departed. I couldn't hand it in at the drop box so I asked my friend Chandler to drop it off at the box since he was still here. I will always be thankful for this since I would have failed that course with no term paper. Thanks again Chandler.

My best friend from when I was younger made a little statuette in woodshop class in high school, and ended up giving it to me. We don't speak a whole lot any more, but I still carry it on me every day, it's my good luck charm.

UNSOLICITED DATE IDEAS FOR GOODTIMES.COM!

You **WON'T** Believe #12 :o

Elspeth Cudmore Rachael Machnee
- ENG PHYS V - & - AERO A V -

Oh look? What do ya know. It's another special helping of unsolicited advice from your local extremely relatable not-at-all bitter fifth years!

Have you ever wanted to be so fly that you get all the honeys? Have you ever wanted to slay it in the sack? And by sack I mean a potato sack, you successful potato farmer, you. Have you ever wished upon a star? It doesn't matter who you are? I don't know what you came here looking for, but you're in the right place. Every great thang starts with a gr8 d8 m8.

Having jointly accrued many years of experience suffering, we (that's us?? wow?) would like to share our top 69 million date ideas with you all to ensure happy fun times! Unfortunately we have been informed that our page space is not infinite and that we need to cut down a wee bit. Below are our top 10 great on-campus ideas date ideas. It's October my dudes!*

1. Come in on a Sunday and the two of you can explore Mackenzie Mission Impossible-style while trying to find a way into the building through locked doors. Bonus Level: You've made it in and have gotten so lost that you now need to try to escape back out! Oooooo spooooky!
2. Enjoy the romantic view together from the top of Duntun Tower! Strategically plan this around all the elevators being down for maintenance because exercise never hurt anyone! Nothing embodies romance quite like minor heart failure!
3. Hang out in Leo's, just the two of you and your 50 closest classmates!
4. You and your significant other can spend meaningful bonding time together while trying to find an open Tim Hortons. Or don't. The line will never be worth it.
5. Go to the machine shop and make something that will last as long as your love (depending on your material of choice results may vary, we recommend paper straws)
6. F*** in the helicopter between 2nd and 3rd block! Nothing says romance like a good roll in the hay!
7. Get tested together at health services! There's nothing like knowing where you both stand sexual-health wise before starting a new relationship! (Actually tho)
8. Iojrf;dijgkladj oiaje; lkgdjflk ajoierjeaoijlskdj fkl jrieaojfs;dlkfj eoij fal;kdjs fl (this really works, trust me)
9. It's pumpkin spice season! Live it up with your bae and enjoy poisoning your body with this ungodly, vile beverage! There are multiple locations for satanic beverage worship on campus!
10. Have a romantic picnic under the UC underpass at night! You'll enjoy a unique ambiance created by the combination of smoker's cough, rotten garbage, and discarded boats!

*To Sp00ken up these dates for the month of October, try these dates out while in full costume! We recommend masks as well for maximal seductiveness. We wouldn't wanna see that face either yo.

Did you go on any of these dates? We'd love to see! Slide into our DMs with those date photos!

Additionally: are you eternally woeful? Don't know how to survive 1st/2nd/3rd/4th/5th/6th/7th/8th/9th year? Just gotta get something off your chest? Watch out for our super sp00ky survey in AviationClothes™ for our bimonthly Agony (wine) Aunts column dans la Times. We look forward to helping corrupting your poor souls.

CARLETON ENGINEERING PHYSICS SOCIETY Upcoming Events

Questions?
Contact Sophie B.
CEPS VP Academic
academic@cuengphys.ca

CEPS ACADEMIC WORKSHOPS

The Carleton Engineering Physics Society (CEPS) teamed up with the Centre for Student Academic Support (CSAS) to deliver learning support workshops aimed at improving study habits. Yay!

Everyone is invited to come hang out! There will be coffee and cookies! Check out our lineup for the Fall term:

Oct 15: Studying Smarter [ME 4124 @ 6-7pm]

Nov 11: Time Management [ME 4124 @ 6-7pm]

For those that can't make it, a synopsis of the presentation will be posted in the CEPS monthly newsletter (www.cuengphys.ca).

COFFEE WITH A PROF

This year the Carleton Engineering Physics Society is hosting a monthly "Coffee With A Prof" (CWAP) event at Oliver's Pub, every last Monday 6-7pm. It's an informal sit-down where engineering profs tell us about their current position and responsibilities, their career path and training, what they see as future prospects in the field, and any words of wisdom for us budding engineers.

To help moderate the discussion and ensure some sort of consistency

throughout the series, a set of "20 questions" will be asked, such as:

- What do you enjoy the most/least about your job?
- How did you get your first job after graduating?
- Was there a time you messed up and felt like you'd failed? How did you bounce back?
- Do you have any recommendations as to useful courses or extra-curricular activities for those considering work or study in your field?

Everyone is invited to come hang out! There will be coffee and cookies! Check out our lineup for the Fall term:

Sep 24: Shulabh Gupta (Microwaves & Electromagnetics)

Oct 29: Niall Tait (Solid State Devices & Integrated Circuit Technology)

Nov 26: Mohamed Atia (Mechanics & Embedded Systems)

A transcript of the discussion will be posted in the CEPS newsletter.

Hope to see you there!

THE CARLETON ENGINEERING COMPETITION (C-ENG-C)

C-Eng hosts an annual engineering competition for undergraduate students in the Faculty of Engineering and Design. With eight unique

events to choose from, there truly is something for every skill set. Students compete individually or in teams for the chance to represent

C-Eng at the provincial (or even national!) level, showcasing their talent and networking with fellow engineers and industry professionals.

This year's theme is "C-Eng-Sea," with challenges focusing on water. Like C-Eng-C on Facebook to stay updated on competition sign-ups!

WHAT IS CSES?

THE CARLETON STUDENT ENGINEERING SOCIETY HAS BEEN SERVING THE STUDENTS OF CARLETON ENGINEERING FOR MORE THAN 35 YEARS.

ITS GOAL IS TO PROVIDE ITS MEMBERS WITH ACADEMIC, PROFESSIONAL, AND SOCIAL RESOURCES TO HELP THEM MAKE THE MOST OF THEIR FOUR (OR MORE) YEARS AT CARLETON. IF YOU'RE AN UNDERGRADUATE STUDENT ENROLLED IN A STREAM OF ENGINEERING, YOU'RE A MEMBER OF CSES.

President
Tristan Durie

Hi Friends,
Hope your semester is off to a good start! Be sure to come out October 3rd and October 4th for our Leather Jacket Fittings. They are an icon of Carleton engineering that people use for years. If you haven't gotten to visit us in our office, pop by ME 3390 and say hi! Also, if you are looking to get involved, look at what my fellow exec have in store for October!

VP Finance
Cyлина El-Bouchi

Hey everyone! I hope you are having a good start to your year. It is finally that time of the year, Student Group Funding (SGF) applications are open! Check out our CSES Facebook page for the link to the application form! The strict deadline is Oct. 12th at 11:59PM. Tell the student groups you're in to make sure they apply! If you have any questions, swing by the CSES Office (ME 3390) to ask me or email me at finance@cses.carleton.ca. I hope you have a spooky October!

VP Internal
Owen MacIntosh

Hi C-Eng! I hope you all have been enjoying the first month back at school! Coming up this month we have the Fall General Meeting on the 9th where you will be able to voice your concerns to council and we will be electing a few positions like First Year Councillor or SREE B Councillor! Good luck to all of those who decided to run! Later this month we will be coming out with Pewter Mug Orders for graduating students and hopefully we will be getting a chance to hear from the Constitutional Review Committee and see what they have been working on all summer! That's all from me for now, good luck studying for midterms!

VP External
Bay Ross

Hello everyone! What's coming up this October? Breast Cancer Awareness Month! There will be an event for each week, such as a speaker, coffee house, bake sale and at end of the month a shave off! Come check it out and donate to this amazing cause. For conference's the applications for the Professional Engineers of Ontario Student and Conference and the Conference on diversity are now closed but look out for some information sessions later on. Also don't forget that we have a miscellaneous conference fund where you can apply for funding for non CSES affiliated conferences.

VP Publications
Elizabeth Wilson

Hey friends! Passports and handbooks are all sorted, so come pick them up in the CSES office! This month I'm working on organizing mthe Gong Show team, getting ready to bring you all new episodes in 2019. If you're interested in getting involved, CSES has some great positions open for Fall Hiring so check those out! I'd also like to direct your attention to some of our social media. Follow us on twitter, instagram, and snapchat @mycses to keep up to date with what's happening on campus!

VP Social
Kaylin Paquette

Hey C-Eng! Keep an eye out for all of the exciting events C-Eng has to offer this month, i such as EngFROSH Reunion on the 14th! and Trivia Night on the 15th! Good luck with your midterms as well!

VP Services
Logan McFadden

I hope you all had a great first month of school! Our textbook trade is now closed, thank you to all who participated! The textbook library is open all year so you can come in and rent out books whenever! C-Eng sweater orders are now open until October 5th. You can buy purple, red or a pink sweater (with \$5 being donated to Breast Cancer Awareness). Come place your order now and say hi to us at CSES. We may have some brand new swag so keep your eyes open for those, or come by and buy a FIT shirt (it's a STAMP).

VP Academic
Ahmed Abdalla

Hello C-ENG! I hope you had a great time returning back to school! Septemeber has been busy with planning the Carleton Engineering Competition, National Engineering Month and various workshops! So far we have hosted 2 very successful workshops First-year for Dummies and Finances for Student Societies! Thank you to all who came out and a special thank you to Abby, Dency, and Cyлина for presenting! We will be having our first panel in October stay tuned to hear all about it! C-ENG-C registration will be happening soon (Like the C-ENG-C facebook page for updates) Finally National Engineering Month Directorships will be opening soon as well so watch out for that! That's all from me for now but you will be seeing a lot of me during the month of October so enjoy!
PS - IT'S NEM

DON'T BE A STRANGER! ANYONE INVOLVED IN CSES WOULD BE HAPPY TO TALK TO YOU ABOUT ANYTHING FROM DIRECTORSHIPS AND EVENT PLANNING TO VOLUNTEERING AT LEO'S LOUNGE, OR JUST SHOWING UP TO EVENTS. IT ALL PLAYS AN IMPORTANT ROLE IN MAKING ENGINEERING YOUR FAMILY AWAY FROM HOME. REMEMBER... EVERYTHING COUNTS FOR FLIGHTSUIT STAMPS.

DISTRACTIONS

NEW FEATURE ALERT!

**C-ENG
SIDETRACKS**
Distractions by you!

This month's theme:
Capture Carleton

This month we challenged C-Eng to channel their inner poet and send us an engineering-themed haiku. Below are some of our favourites.

Bless ECOR 1010
For teaching me all I need
F=ma
- Erdem Yanikomeoglu, COMP SYS II

Engineering school
A place to learn much cool stuff
Unless you're civil
- Daniel Shifman, ELEC III

You can't push a rope
It was cows and not sheep
WorkSmart Campus
- Liam Tripp, SREE B II

I like to eat bugz
You look like you eat bugz too
Let's eat together
- Spencer Carlyle, AERO D III

Leo's Lounge, it's great
Cheap food, good friends, and euchre
No artsies allowed
- Luke Siemens, AERO D Alumnus

Eng students don't sleep
They scav they eat they don't sleep
Leo's, they call home
- Sophie Beraud, ENG PHYS II

HORRORSCOPES

ARIES

HALLOWEEN COSTUMES ARE A GREAT WAY TO HAVE SOME FUN PRETENDING TO BE WHAT YOU'RE NOT... LIKE A REAL ENGINEER! JUST DON'T SIGN "P. ENG" ON ANYTHING.

TAURUS

DON'T LET YOUR STUBBORNNESS KEEP YOU FROM HAVING SOME GOOD OLD FASHIONED FALL FUN. SWALLOW YOUR PRIDE AND A PUMPKIN SPICE LATTE AND SEE WHAT ALL THE HYPE IS ABOUT.

GEMINI

BE "THAT GUY" AND HAND OUT APPLES TO YOUR NEIGHBOURHOOD TRICK-OR-TREATERS. OR BETTER YET, JUST LEAVE A PILE OF CHARLATANS ON YOUR FRONT PORCH.

CANCER

YOUR IMAGINATIVE MIND IS BEST SUITED FOR FILLING NEGASUITS WITH SOME BIG THINK ENERGY. SHITPOSTS ONLY PLS.

LEO

LEGEND HAS IT THAT IF YOU CHANT "WORKSMART CAMPUS" THREE TIMES IN FRONT OF A MIRROR, GLENN McRAE WILL APPEAR TO GIVE YOU A POP QUIZ. DO YOU DARE ATTEMPT TO SUMMON HIM?

VIRGO

THANKSGIVING IS COMING, SO MAKE SURE YOU HAVE VALID CAREER PROSPECTS, EXCELLENT GRADES, AND A SIGNIFICANT OTHER BY THAT TIME. YOUR FAMILY EXPECTS IT OF YOU.

LIBRA

HAVE YOU HEARD OF THE GHOST OF HERZBERG? KEEP AN EYE OUT FOR FLICKERING LIGHTS IN AN UPPER FLOOR WINDOW. I ALSO HEAR IT LIKES DONUTS.

SCORPIO

SOME LUCKY SCORPIOS HAVE BIRTHDAYS DURING READING WEEK! PARTY HARD, BUT BEWARE THE PROFS WHO SCHEDULE THEIR MIDTERMS AFTER THE BREAK...

SAGITTARIUS

DID YOU KNOW WEED IS BEING LEGALIZED THIS MONTH? OF COURSE YOU DID. TRY NOT TO BUY OUT THE *ENTIRE* LEO'S STOCK OF CHIPS IN AN EFFORT TO SATISFY THE MUNCHIES.

CAPRICORN

DON'T RELINQUISH YOUR SELF CONTROL THIS MONTH! EATING 2.2 KG OF HALLOWEEN CANDY SEEMS LIKE A GREAT IDEA UNTIL YOU ACTUALLY DO IT. EATING SUGAR? NO PAPA!

AQUARIUS

TAKE IN THE BEAUTY OF FALL WITH A NATURE WALK! FOR THE FULL EXPERIENCE, BE SURE TO GO ALONE AT NIGHT WITHOUT A FLASHLIGHT. IF YOU HEAR A STRANGE NOISE, INVESTIGATE IT!

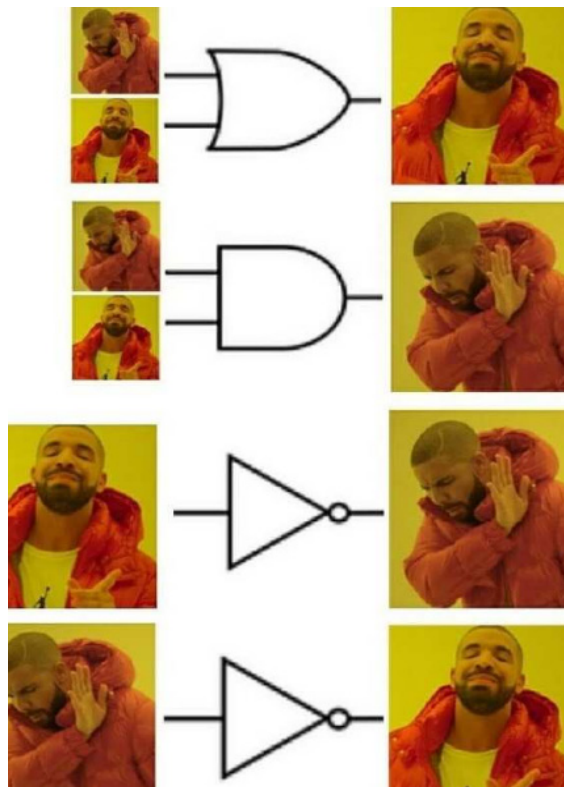

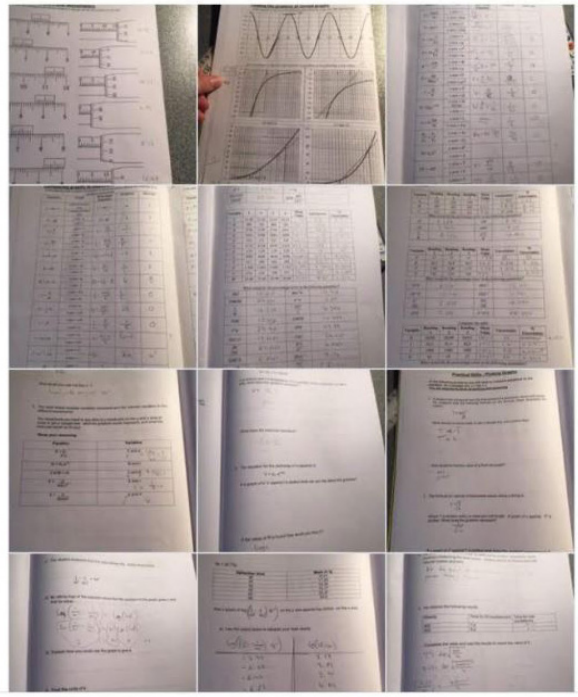

PISCES

BE INSPIRED THIS MONTH TO REWORK YOUR ZOMBIE APOCALYPSE PLAN. WHICH OF YOUR FRIENDS WOULD YOU SACRIFICE FIRST? BIG QUESTIONS.

DISTRACTIONS

SOME DILBERT FOR YOUR ECOR 1010 NOSTALGIA

You know you're a good friend when your camera roll is like this

lly = I love you
 lmy = I miss you
 Brb = Be right back
 $pV = nRT$
 $F = ma$
 $KE = (1/2)mv^2$
 $p1V1 = p2V2$
 $E = mc^2$

LAST CALL

THE NEWSPAPER EQUIVALENT OF "CLOSING TIME"

THE IRON MAN NICOLAS "GOLDEN SHOWERS" VIRC - AERO D III -

C-Eng Involvement:
CMAS x3
(1st Year Rep, 2nd Year Rep, Co-Director of Events)
C-Eng Musical Cast x2
EngFrosh x3
(Frosh, Facil, Head)

Hailing from: Rockland, Ontario
Song that is the anthem of your life:
Anything from #EdgyNic on Spotify.
If you weren't in engineering, what would you be pursuing?
I'd probably be a rockstar, that could still happen though...
Weirdest thing you've ever purchased:
2000+ cotton balls, the quantity made it weird...
Memory that you never want to forget:
Performing on stage for the first time.
Most private thing you're willing to admit:
I eat oreos with a fork.
Most useless talent:
I can eat a whole box of cookies in one sitting.
If you could have any super power, what would it be and why?
Run as fast as the Flash, I would never be late to anything (especially class).
Gimme your smoothest pick-up line:
Have you heard of Edgy Nic? Because I am that guy.
If there is a god/creator of the universe and you could ask it one question, what would it be?
Is garlic spicy?
Hit me with your best six-word horror story:
Your lecture is now in Loeb.

USES FOR THE CHARLATAN

- > Hand out to unsuspecting trick-or-treaters
- > Tear it up and make a mummy costume
- > Scrunch it up into a pillow for your road trip home this Thanksgiving
- > Build a boat and feel nostalgic for Engfrosh
- > Roll them up for an EPIC SWORD FIGHT TO THE DEATH
- > Lay it down when painting to keep your desk clean
- > Keep the Engfrosh rental truck scratch free from ratchet straps (see Figure 1)

Figure 1: An acceptable use for the Charlatan

- > You could read it

THE IRON LADY KATIE "ANNIE" MILLER - BMED ELEC IV -

C-Eng Involvement:
Engfrosh x4
(Frosh, Facil, Head, Group Co)
Leos Lounge x3
(Stock Manager x2, General Manager)
C-Eng Musical Dancer x4

Hailing from: Kanata, Ontario
Song that is the anthem of your life:
Clocks by Coldplay
If you weren't in engineering, what would you be pursuing?
Likely some sort health science, hence doing the biomedical part of my degree.
Weirdest thing you've ever purchased:
I don't purchase weird things. I have people to do that for me.
Memory that you never want to forget:
Not so much a single memory but I never want to forget the wholesome and surprising feeling of having your heart feel full, whether its from an unexpected hug or compliment or something.
Most private thing you're willing to admit:
I really really hate crying. If for some reason you ever see me cry, please pretend I'm not crying and ignore it.
Most useless talent:
Being able to make weird squawking noises.
If you could have any super power, what would it be and why?
Ability to manipulate time - endless naps!
Gimme your smoothest pick-up line:
I have one but its not safe space lel
If there is a god/creator of the universe and you could ask it one question, what would it be?
Mosquitos?? WHYY
Hit me with your best six-word horror story:
Your skin will fit me nice.
